### About This Content

The Class 455 EMU is typical of the new generation of multiple units introduced in the 1980s to replace aging and out-dated 'heritage' units. Designed for use on Southern branch-line and suburban services with numerous stops and little need for high top speeds, the Class 455 runs in 4-car formations up to a maximum speed of 75mph, and remains a familiar sight around South London and all along the Southern network. A total of 137 Class 455 sets were produced, and with regular refurbishments taking place the type is still playing its part to keep Southern England moving.

The Class 455 for RailWorks 2, developed by Thomson Interactive, includes 3 liveries, accurately reproduced drivers cab and controls including functional DRA (Drivers Reminder Appliance), independent wiper selection, functional glare screen visor and opening cab windows (animated in-cab and external view), and all-new sounds recorded from a real Class 455.

First things first: I don't consider it to be a game, but a interactive narrative. I respect whoever thinks otherwise.

This isn't the problem, though. The problem is that the graphics are terrible, the audio isn't good, the voice-acting is disapointing and the dialogues and the plot itself are awful.

The only one good thing I found in this title is the credits style and song.. A very good mix of First Person Shooter and Tower Defense game. Graphics are cool, but may require a bit excessive hardware to run without crashes. Mechanics are well implemented, specially a very balanced maths. Player must to drive a mech, higly customizable with removable parts and a big weaponry variety that can be adquire by buying, looting, doing missions or getting achievements; even the character dressing is customizable. Also, player can deploy turrets by everywhere by collecting enemy scrap, and there are many types of towers. Retro-futuristic ambience are fine depicted, the plot is fresh and with certain humour sense. Has sufficient kind of foes and they are well designed, maps are very fine developed too. Gameplay is a pleasure, really fun and addictive. To complete the main mission and 3 survival maps, to collect all possible items with getting 70% of achievements, takes about 100 hours. Is an indie product so unknown as well made, that deserves much more fame. Hopefully the designers do a second part: it isn't necessary to make it better, just more of the same.. This is one of my favorite games. It's wacky, it's fun, and just fantastic all around. The story is fun, and this is one of the games that has an endless that doesn't seem freakishly repetitive. There's an awesome boss fight at the end of the game, and there are lots of fun things that happen.. Great Series. Great job! I passed over this a few times but sure glad I got it because this is the ULTIMATE Jigsaw. I luv it!

It is AWESOME! I can't imagine how this was done but its really cool how each piece is animated and no matter where you put them its "alive".

Do not be fooled by the steam store page, this game has fully implemented online play through the steam system. I bought it for it's gameplay, and still enjoy it for that and it's well done online laddering.

Not only are the controls solidly simple, but they also allow for quite a few physics based trickes to be pulled off. This results in gameplay that rarely gets dull and allows the player's playstyle to clearly show in multiplayer matches.. An ambient, quirky, simple puzzle-platformer. Difficulty is not consistent, however. The majority flows pretty easily up until some snags - one in particular may drive some insane. Still, very relaxing soundtrack and immersive visuals definitely should speak to the indie platformer fan.. I have more experience with CO1, but I can affirm that this is one of the greatest wargames ever. The order of battle and the simulation of delay is really top notch. A true grognard game and a not so much steep learning curve. It's very rewarding when you get that battallion behind the enemy position as you put it through a little road on the flank and smash the rear echelon of a division.. This is a very under-rated airplane. Great physics, really easy on the frames, and lots of fun! Many little things work like the bomb bay doors. Do a little reading in the manual and you'll have a blast! A few quick start pointers I can think of:

Don't be ashamed of Ctl+E, pretend your first officer is doing the startup.

Take off config IS in fact full flaps

Use your "Angle of Attack" tape on the far left to reference when to retract, or extend your wings or flaps. (I use above or below 5 degrees as reference.

Your Nav/GPS switch is the knob on the bottom left of your PFD, right click the knob in the right corner to turn that PFD on.

I leave the comments open if I can be of any extra help. Highly recommended, especially for sale price.. Animation could be better but it's ok, my and my friends like it though, we get a kick out of it.

Different kind of zombies but they all seemed to slide on the floor if you escape from them.

You can lure the zombies to the train tracks and they suffer a terrible death!

Overall is good, would like to see more action but you can explore as long as you avoid enemies.

Like riding the trains, they have a schedule and reminded me of my time in Europe.

Waiting to see if they make a multiplayer so that we can all play.

. Very glichy. Dosen't work very well. Better of playing DRLs simulator.
